

StubHub Sales API (2.249.0.0)

Sales

View your sales details and fulfill your sales.

List sales (recent updates)

List sales for the authenticated user that have been created or updated over a certain period of time.

AUTHORIZATIONS: >

OAuth2

QUERY PARAMETERS

updated_since

string <date-time>

Filters the response to only return items that have been updated since the given timestamp

Responses

✓ 200

Update a sale

AUTHORIZATIONS: >

OAuth2

PATH PARAMETERS

saleId
required integer <int32>

REQUEST BODY SCHEMA: application/json

One of PatchSaleRequest

confirmed	boolean or null True when the sale should be confirmed; Otherwise, false.
eticket_ids	Array of integers or null <int32> A array of the identifiers of the E-Tickets or proof of transfer to be assigned to the sale.
transfer_confirmation_number	string or null Transfer confirmation number.
eticket_urls	Array of objects or null (ETicketUrlRequest) Urls with which the buyers can access the etickets.
change_paper_ticket_to_eticket	boolean or null True when the ticket(s) should be changed from paper to E-ticket; Otherwise, false.
confirm_same_day_shipment	boolean or null

True when same-day shipment is confirmed; Otherwise, false

in_hand_at

string or null <date-time>

The date and time that the seller has the tickets 'in hand' to deliver to the buyer.

eticket_type

string or null

The type of ticket(s) that was sold.

tracking_number

string or null

Tacking number of the ticket shipment.

seating >

(Seating (object or null))

Any updated seating information about the tickets sold

barcodes

Array of objects or null (BarcodeInformation2)

The barcode(s) for the ticket(s).

mobile_provider

string or null

The vendor being used to transfer the mobile ticket. Can be one of the following values:
StubHub, Viagogo, Ticketmaster, AXS, SeatGeek, Ticketmaster Account Manager, MLB
Ballpark, MPV, Paciolan, Tickets.com, Tickets.com RDP, Vivenu, Ticketmaster CA, Eventbrite,
Livenation, Broadway, Telecharge, Ticketon, Seetickets, Etix, Tixr, Festicket, Insomniac,
DicelImport, MGMResorts, Tickeri, SmithCenterImport, Stubwire, Computicket,

Sale

A sale on the StubHub marketplace that belongs to the currently authenticated user.

id	integer or null <int32> The sale identifier.
created_at	string or null <date-time> The date when the sale was created.
seating >	(Seating (object or null)) The seating information for the ticket(s) that have been sold.
proceeds >	(Money (object or null)) The total amount that the seller will receive for the sale.
number_of_tickets	integer or null <int32> The number of tickets that have been sold.
status	string or null A short localised string describing the current status of the sale.
status_description	string or null A localised in-depth description of the current status of the sale.
display_proceeds >	(Money (object or null)) The total amount that the seller will receive for the sale.
confirm_by	string or null <date-time> The date by which the seller must confirm the sale.

ship_by	string or null <date-time> The date by which the seller must ship the tickets.
external_listing_id	string or null The listing identifier assigned by an external system, typically generated by the seller's inventory management software.
is_legacy_stubhub_order	boolean Boolean value that is set to true for legacy stubhub orders.
barcodes	Array of objects or null (BarcodeInformation) The barcode(s) for the ticket(s).
in_hand_at	string or null <date-time> The date and time that the seller has the tickets 'in hand' to deliver to the buyer.
_links >	(SaleLinks (object or null))
_embedded >	(SaleEmbeddedResources (object or null))
